

“Dogs will eat anything, unless there’s a pill in it, then they become Gordon Ramsey”

Nutritional pet strips instantly stick to your best friends' mouth, preventing the beneficial nutrition from being discarded and wasted. With our **FlashRelease™** technology, the strips begins to dissolve instantly, improving bioavailability and time to efficacy.

Hip and Joint Strips

MADE WITH:
FlashRelease
TECHNOLOGY

Many dogs suffer from arthritis as they age. This painful condition, which occurs in dogs (and people) results when cartilage, the cushioning between the bones, begins to thin and wear away. As a result, the ends of the bones start to rub against each other, and you may notice your dog starting to limp.

Natural Ingredients: The supplement combines natural ingredients known for their health benefits, ensuring a safe and effective solution for pet joint care.

BENEFITS:

- **Glucosamine:** A naturally occurring compound, is one of the more popular over-the-counter arthritis remedies. Alleviate pain and joint wear. It is said to alleviate the symptoms of joint damage by boosting the repair of damaged cartilage, specifically articular cartilage, or the moist, spongy material that forms a cushion between joints.
- **Chondroitin:** While Chondroitin naturally occurs in your pets' body, adding a supplement can help repair connective tissue that cushions joints. Chondroitin can soothe pets' pain, reduce arthritis symptoms and give your pet increased mobility in their joints.
